12%	Positive changes to cholesterol	12%	Positive changes to blood sugar levels	8%	Improved sleep quality
4%	Positive changes to cognition and memory	4%	Other		

Facilitators and Barriers

USC WorkWell Center

Top 3 facilitators or barriers participants experienced when engaging in the new behavior:

Lack of time

Participants expressed that lack time was a barrier to adopting habits such as finding time to attend EatWell Bites or preparing and consuming balanced meals.

Accountability and Routine

Participants noted that accountability is important to implementation but when they practice healthier habits and get into a routine they feel better.

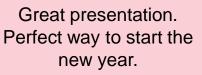

Motivation

Participants indicated challenges making behavior changes, but needing to give themselves grace and not feel defeated, take small steps, and just do it.

Testimonials

Bite size nuggets of information are perfect to get me motivated to participate as well as practice what I have learned and ponder on what other substitutions I can make to liven up my meals. Thank you. I have really enjoyed all the sessions I have joined. I like that they are concise, however, there are times when I wish we had more time.

Thank you for making the recording available since I was not able to attend the live session. I like the session is 30 minutes.

I have been enjoying attending the EatWell Bites webinars. The information received is outstanding and so helpful for me.

Comments, Suggestions, and Feedback

Gratitude and Taking Action

"I love how the topic echoes one of the parts about eating well I've been really curious about! I feel like having a place to make healthy food and that can inspire you to cook or make it easier for you to do so is definitely a goal of mine!"

"Really great information that I can apply to my daily life! Presentation was well-organized and speaker was very knowledgeable."

"Loved it!! I've been wanting to eat more vegan and vegetarian meals, and I was left feeling inspired, excited, and more capable after the presentation!"

Thank You

"I really enjoyed the lecture. Learning how to create a balanced diet is extremely important. There is so much processed food at the grocery store and on every corner, that I feel we need to re-learn how to create meals using whole foods again. Thank you for hosting these and looking forward to attending the other sessions!"

"I enjoyed the EatWell Series very much! Look forward to the Fall series."

"These EatWell Bites are FANTASTIC!! I learn so much and I have been able to encourage family members with useful information."

USC WorkWell Center

Suggestions

"It would be nice to have the session start at 12 instead of 12:15 as I miss out on non-rounded times and also a Q&A time at session end would be helpful instead of rushed Q&A."

"I would love to see series on just salt (different types, good vs bad, importance), oils (healthy vs bad), what makes them bad and how much to have."

"I love the format and the time length, even though sometimes I feel there isn't enough time for some topics! I do appreciate the eff orts to address any questions via email if time ran out."

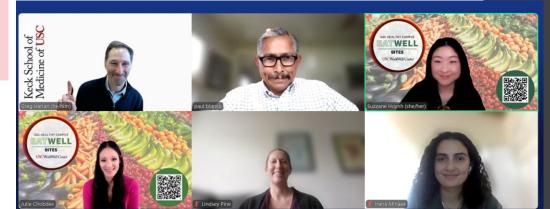

"I would like more suggestions on how to incorporate superfoods into everyday meals."
